User Manual

Epicurean Eats, a popular restaurant renowned for its exquisite cuisine and inviting ambiance, encountered challenges with booking customers efficiently. The manual booking process often led to confusion, missed reservations, and frustrated patrons. Recognizing the need for a more streamlined approach, Epicurean Eats embarked on the journey to develop a comprehensive booking system. This system was designed to empower staff by offering features such as creating, editing, sorting, and canceling reservations. With this innovative solution in place, customers can effortlessly reserve their desired dining experience, whether it's a romantic dinner for two or a family gathering. The ability to edit reservations provides flexibility, accommodating changes in party size or preferred timing. Sorting options allow staff to organize reservations efficiently, ensuring optimal seating arrangements and smooth service. Moreover, the ability to cancel reservations simplifies the process for both customers and staff, minimising no-shows and optimising table turnover.
